

Ben Basil Tomy
Development Lead

We set up Claude to draft our whole funnel from one brief.

Steal the entire setup (it's just **6 simple steps**).

Claude: Projects

New chat

Chats

Projects

Event funnel

One brief. Every draft.

CONTEXT

One brief = consistent pages, emails and invites.

Start each piece in a blank chat and each one guesses. The page promises one thing, the invite another. Put the facts in one file and **every draft reads from it**.

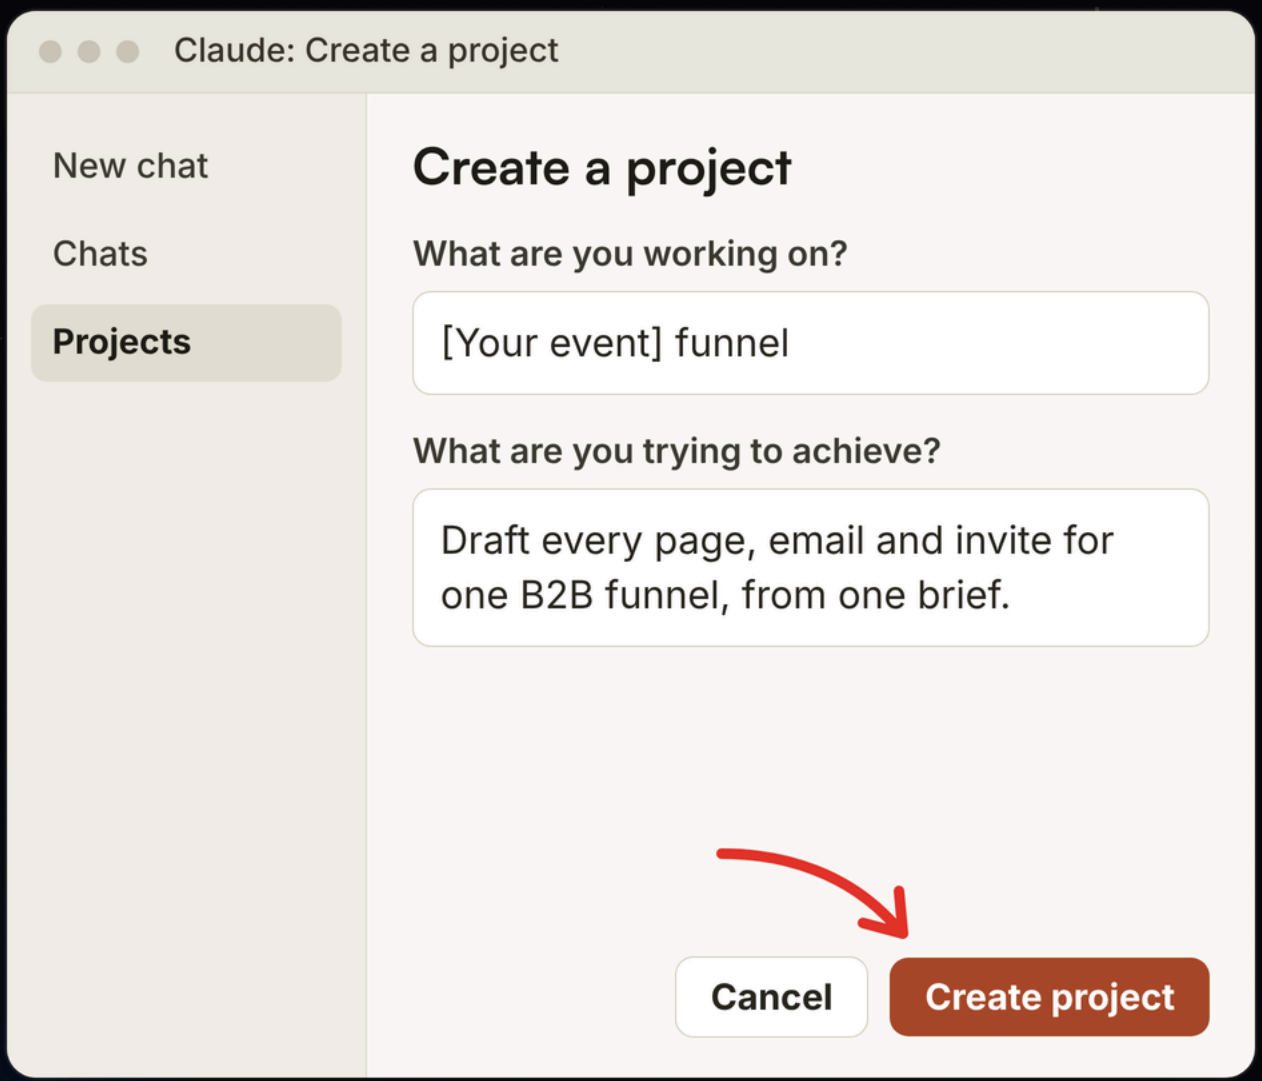

Ben Basil Tomy
Development Lead

STEP 1 OF 6

Make one Claude project.

One project holds the whole funnel. Not a new chat for every asset with the facts pasted in again.

Ben Basil Tomy
Development Lead

STEP 2 OF 6

Write the brief.

One file, five parts: **offer, buyer, proof, event, voice**. Then add it to the project's knowledge.

funnel-brief.md

```
# Funnel Brief

## Offer
  who it's for, the outcome, by when
## Buyer
  role, company, their objection
## Proof
  only results you can show
## Event
  title, date, time zone, link
## Voice
  I and you, short lines
```

Added to project knowledge

+ Add content

Ben Basil Tomy
Development Lead

STEP 3 OF 6

Paste the setup prompt.

It goes in the project's instructions, so every chat starts with the same rules.

Claude: Set project instructions

Set project instructions

```
You are my funnel copywriter and RevOps
assistant for one B2B funnel.

HOW WE WORK
1. One element at a time.
2. Mirror the reference example.
3. Facts only from the Funnel Brief.
4. A missing fact becomes [FILL].
5. An A and a B version of each line.
```

Cancel | Save instructions

Ben Basil Tomy
Development Lead

STEP 4 OF 6

One prompt per piece, in a new chat each.

The page in one chat, the invite in the next. The brief and the rules come along, because they live in the project.

Claude: Event funnel

+ New chat

IN THIS PROJECT

Registration page

Calendar invite

Reminder emails

Follow-up email

New chat in Event funnel

YOUR TASK: write the calendar invite for my session.

One prompt, eight parts:

YOUR TASK | WHERE THIS SITS | THE FACTS TO USE | THE TEMPLATE | RULES | REFERENCE EXAMPLE | WHAT TO RETURN | CHECK

Ben Basil Tomy
Development Lead

STEP 5 OF 6

Missing facts stay [FILL].

No guessed numbers, names or results. If the brief doesn't have it, Claude marks the gap and lists it at the end.

Claude: Registration page

Registration page, version A

A 60-minute session for [buyer role]s who want [outcome] by [date].

Who it's for: [buyer role]s at [company type]

Proof: **[FILL: a result you can show]**

Your host: **[FILL: one-line bio]**

GAPS TO FILL

1. A result you can show
2. The host's one-line bio

Ben Basil Tomy
Development Lead

STEP 6 OF 6

A person approves before anything goes out.

Claude drafts. You check each piece against the brief, fill the gaps and approve it. **Nothing is sent from the chat.**

Review: Calendar invite, version A

Calendar invite, A Waiting for approval

- [x] Every fact is in the brief
- [x] No [FILL] left in the draft
- [x] Title under 60 characters
- [x] Reads like a person wrote it

Send back Approve

We walk through this setup in our free live workshop.

1. Make one Claude project
2. Write the brief
3. Paste the setup prompt
4. One prompt per piece, new chat each
5. Missing facts stay [FILL]
6. A person approves
